

Joel Daniel Chandanshiv

Pune, India | [+91-9767010181](tel:+91-9767010181) | joelchandanshiv@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software Engineer with hands-on experience building cloud-native applications, backend systems, and AI-powered solutions. Skilled in AWS, Docker, Kubernetes, Terraform, Python, FastAPI, and Next.js, with experience developing scalable software and automating deployment pipelines through modern DevOps practices.

EDUCATION

Savitribai Phule Pune University	2022 - 2026
<i>Bachelor of Engineering, Computer Engineering (CGPA 8.9)</i>	<i>Pune, India</i>
Higher Secondary Certificate (HSC) (70%)	2020 - 2022
Indian Certificate of Secondary Education (ICSE) (95%)	2010 - 2020

SKILLS

- **Programming Languages:** Python, Java, SQL, Bash
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Helm, Terraform, Jenkins, GitHub Actions, Ansible, Linux, Git, Kafka
- **AI/ML:** TensorFlow, PyTorch, Scikit-learn, Hugging Face Transformers, OpenCV, NLP, RAG
- **Backend & APIs:** FastAPI, Flask, REST APIs, NGINX
- **Databases:** MySQL, Firebase
- **Monitoring & Logging:** Prometheus, Grafana

EXPERIENCE

Apptware DevOps Intern	Feb 2025 - May 2025
• Built CI/CD pipelines using Jenkins, GitHub Actions, Terraform, and AWS, reducing deployment time by 40%. • Contributed to AWS cloud migration initiatives, helping improve infrastructure scalability and reduce operational costs by 25%. • Deployed containerized applications using Docker and Kubernetes for scalable and consistent deployments. • Introduced basic monitoring and alerting with Prometheus and Grafana, enabling faster issue response.	
Google Developer Students Club Technical Team Manager	Oct 2023 - Sep 2024
• Led and mentored the technical team in organizing workshops, hackathons, and events to foster hands-on learning. • Organized and conducted beginner-friendly sessions on DevOps tools like Git, Docker, and GitHub.	

PROJECTS

MarketPulse: Real Time Financial Risk Analysis Platform (Kafka Docker Jenkins AWS S3) GitHub	Jan 2026
• Built a real-time financial risk analysis platform using Apache Kafka to stream and analyze live cryptocurrency market data • Applied Isolation Forest-based anomaly detection with consistent feature engineering across streaming and batch pipelines. • Designed a unified ML pipeline supporting offline training, real-time inference, and batch risk analytics with feature parity. • Automated containerized deployment with Docker and Jenkins CI/CD pipelines, persisting trained models and risk metrics in AWS S3.	
SynapseMind – AI-Powered Messaging Intelligence Platform (AWS Docker NLP) GitHub	Feb 2026
• Built an AI-powered messaging platform integrating Matrix Synapse with Instagram, and WhatsApp. • Implemented AI-based summarization and intent detection to extract actionable insights from conversations using FastAPI and Hugging Face Transformers. • Developed a real-time dashboard using Next.js for message visualization and AI insights. • Deployed the platform on AWS EC2 using Docker and NGINX for secure, scalable access.	
DevOps-Enabled Grape Disease Detection System (AWS + MLOps) GitHub	May 2025
• Built a ResNet CNN based grape disease detection system, achieving 98% accuracy and deployed on AWS SageMaker. • Built an end-to-end MLOps pipeline with Docker, GitHub Actions, Terraform for automated training, deployment, and infrastructure provisioning. • Deployed for scalable inference via SageMaker Endpoints, Lambda, and API Gateway, with explainability from Amazon Bedrock. • Developed a Flask frontend with secure AWS integration for real-time disease prediction.	

ACHIEVEMENTS

- **Winner, Smart India Hackathon (SIH) 2024** for developing an IoT-based Smart Biogas Monitoring System.
- **International Idea Patent** – Smart Biogas Monitoring System (Application No. TEMP/E-1/115305/2024-MUM).
- Participated in multiple online and offline hackathons, securing spots in the grand finale of several prestigious events.

CERTIFICATIONS & LANGUAGES

- Oracle Certified DevOps Professional (2025)
- Oracle Certified Foundations Associate (2025)
- German – A2 Level
